

Jack Stefanou

Full-Stack Developer · AI

Bogotá, Colombia · available immediately · jackstefanou@gmail.com · jackstefoto.com · github.com/huellasenarena · [LinkedIn]

Profile

Full-stack developer specializing in AI. I build products end to end on my own: the interface, the server, the database, and the AI model integration. I build tools that let me focus on what I actually enjoy: reading, writing, and learning languages. I've spent two years teaching AI and Python to students around the world, so I know how to explain what I build. Native English speaker; Spanish C1.

Projects

Bring Your Own Vocab · byov.net

I highlight a word on my phone, tap a button, and the app builds me a quiz on which situations the word fits.

- Capture from iPhone or Kindle: a Cloudflare Worker detects the language, uses an LLM to check that the word exists, and sorts it into a group.
- Open to the public with Google or email login (OAuth, PBKDF2, JWT) and a "Bring Your Own Key" model: each user brings their own OpenAI or Gemini key.
- Redesigned the practice mode after measuring that free-form writing got me to only 52 mastered words in three months. Now quizzes give instant feedback.

JavaScript · Cloudflare Workers · Cloudflare D1 · OpenAI · Gemini · iOS Shortcuts

A mí me strofa · Can a model predict my taste in poetry?

- Generated Vertex AI embeddings for 187 poems I had rated, and compared a logistic regression trained on my ratings against Gemini.
- In production: FastAPI on Cloud Run, predictions frozen in BigQuery before I rate each poem, and a champion–challenger gate for promoting new models.

Python · scikit-learn · Vertex AI · Cloud Run · BigQuery · Cloud Scheduler

News Reader

My own reader for the French, Spanish, and Greek press: it fetches articles twice a day and gathers them on a single page.

- Playwright for hard-to-reach sites like Europresse; the WordPress REST API for Greek outlets.
- Flask on a Raspberry Pi behind Cloudflare Tunnel, with downtime alerts (UptimeRobot, healthchecks.io) and offline reading.

Python · Flask · Playwright · SQLite · Raspberry Pi

Qué Mal Poema

A blog where publishing takes 3 clicks and 2 seconds. 160+ posts.

- Shortcut → Apps Script → Google Docs. A daily GitHub Action reads the document, validates it, publishes to GitHub Pages, and pings me on Telegram.

Python · GitHub Actions · Google Docs API · Apps Script · OpenAI

Experience

Inspirit AI · AI Instructor & Curriculum Developer · Remote · Jul 2024 – Present

- Created and updated coding projects in the curriculum, including one where students turn a rule-based chatbot into a "smarter" one.
- Improved lectures on computer vision, ML, chatbots, and AI ethics with new exercises, videos, and a clearer structure.
- Teach AI and Python live to 300+ students aged 12–18 from the US, China, Canada, Europe, and India, with up to 5 hours of class a day in peak season.

Independent Tutor · Wyzant · Nov 2024 – Present

SAT prep, math, and programming, with my own client base.

Education

B.A. in Pure Mathematics · University of Southern California · 2023

Technical Skills

- **Languages:** Python, JavaScript, SQL, HTML/CSS
- **Backend:** Flask, FastAPI, Cloudflare Workers, REST APIs, Playwright
- **Data:** SQLite, Cloudflare D1, BigQuery
- **AI & ML:** OpenAI, Gemini, Vertex AI, embeddings, scikit-learn
- **Cloud & infrastructure:** Google Cloud (Cloud Run, Cloud Storage, Cloud Scheduler), Cloudflare, GitHub Actions, GitHub Pages, Raspberry Pi, systemd
- **Security:** OAuth 2.0, JWT, PBKDF2

Languages

English (native) · Spanish (C1, DELE) · French (C1, DALF) · Greek (B2)
